**Subject: declaration letter**

To whom it may concern,

with reference to the certificate nr. 17020 Rev.2 issued by Kiwa Cermet Italia S.p.A., we can declare that a photovoltaic module produced with a different frontsheet color compared to the tested ones, can be considered from quality and electrical safety point of view equivalent to the tested models.

The rated power output of the PV model types with different frontsheet color shades has not been verified directly by the Kiwa testing laboratory, however the power output is included between the measured power of the darker color and the measured power of the lighter color.
